

Coronavirus

What's happening?

=

Coronavirus is a new disease.

+

People all over the world are poorly and staying at home.

+

People are coughing and have a fever.

Adults

might

take my temperature

to see

if

I

am poorly.

Adults

look after me

if

I

am poorly.

Poorly

people

might

feel

sleepy

and

tired.

Adults

might

remind

me

to cough

into

my

elbow

or

a tissue.

Coronavirus spreads from person to person.

Coronavirus spreads by coughing and touching things.

We might have to stay at home to protect against the virus.

We don't know how long we have to stay at home.

At home,

we

might

play

with toys,

look at books,

listen to music,

sing songs,

watch TV,

use the iPad

or

computer,

relax,

do some work,

do puzzles,

play with a soft ball,

dance,

do mark-making,

drawing,

painting

or

colouring,

play games,

or

do arts and crafts.

We

might

not go

out

to the playground,

shops,

church/temple/mosque

sports centre,

swimming pool,

friend's houses

or

other places.

We

can do

fun

indoor

activities

instead.

We

will not

see

people

if

they

are poorly.

We

must

wash our hands

often.

We

rub our hands

with

soap

**20**

for 20

seconds.

Handwashing

helps

us

be healthy.

Handwashing

helps

stop

the virus

spreading.

Coronavirus

might

feel

scary,

annoying,

or

confusing.

Adults

will look after

me.

Adults

will help

me

feel better.
